2. Knowledge Inventory

What do they already have, and where does it live?

Source / Document Type	Location	Format	Update Frequency	Who Owns It

Current organization

Aspect	Notes
Naming convention	
Folder structure	
Metadata / tagging	
Version control	

Gaps identified

Gap	Applies?
No consistent naming convention	
Documents not structured for AI retrieval	
Key data buried in images / complex tables	
No metadata headers	
Knowledge spread across too many systems	
Other:
